FOREWORD BY THE MANAGEMENT BOARD

Keegan Viscius (CEO)

Andreas Schillhofer (CFO)

DEAR SHAREHOLDERS,

Our business faced a great deal of challenges and uncertainty in recent periods, including sustained geopolitical risk, political polarisation and democratic challenges, economic uncertainty and shifting investment preferences, and intensified climate events. Though long-term how the market will develop is still unclear, we can confidently say our business has remained resilient and stable.

Operationally, in the first quarter of 2025 we made further important progress in implementing our strategic priorities to strengthen our business and generate value for our shareholders. As a result, we continue to deliver stable operating performance and results for the first quarter of 2025 – gross rental income and FFO I increased by 7% and 28% respectively yoy, three disposals of non-core assets were closed on average at a premium to book value, and our development pipeline progressed on time and on budget.

Increased occupancy and income

Active asset management with teams on the ground in our local markets allowed us to quickly respond to tenant demands and market developments, further increasing our occupancy rates and income despite the decreasing overall portfolio size due to sales:

- Occupancy up from 93.1% (31.12.2024) to 93,5%,
- Signed total leasing of c. 35,000 sqm of new and extended existing leases at rents around 16% above the expected rental value (ERV),

- Signed 20 leases representing 22% of current vacant space with future start dates,
- Grew gross rental income by 7% to €69m despite non-core income producing property sales,
- Reduced landlord non-recoverables, improving net rental income by 12% to €54m, and
- Increased FFO I by 28% to €34m.

Progressed profitable development pipeline

As at the reporting date, we have two office properties under development in Berlin Europacity:

- Upbeat is 100% pre-leased and on track to complete in early 2026,
- Anna-Lindh-Haus started in 2024, overall progress encouraging.

Three more projects in prime central Berlin are advancing through the preparation and planning phase – two ground-up developments (one located at Humboldthafen, the other at Hallesches Ufer in the vicinity of Potsdamer Platz) and the refurbishment of Karlsbad 11, one of our older standing assets. Once completed, these assets will further strengthen our prime office footprint in our largest core market of Berlin.

All developments under construction and planned are state of the art buildings with highest level of technology, specification, certification, and sustainability features that we believe will maintain their relevance through future leasing cycles.

Closed successful sales

We pursue a proactive, disciplined approach to our activities as an investor, manager, and developer of modern prime office properties, and focused early on disposing of non-core assets, continued disciplined reinvestments into our assets, and on simplifying the business model.

Our strategic focus remains to take advantage of market liquidity to sell non-strategic assets as well as monetise future profit where no further value creation exists. Against this background, we target to sell properties that are non-core in terms of asset class, location, building quality, age, or value creation potential. During the first months of 2025, we made the following progress in implementing our capital rotation programme:

- Closing of five non-core property disposals to date (thereof three in Q1),
- Sales included our last property in Serbia (market exit) as well as a property with main usage hotel (Berlin), and
- Signed the sale of five additional properties to date (three plots in Munich, a logistics property in Berlin and an office building in Vienna) with closing expected in Q2 or Q3 2025.

Following these sales, our portfolio has improved in terms of quality, focus, geographic footprint, and sector.

As part of our marketing of one of the CEE assets held for sale, we have received unsolicited interest to acquire the entire country exposure, which we have decided to explore. We will also evaluate the sale of our remaining assets in Austria and CEE in part or full should there be investor interest at attractive pricing for non-core assets as per our above definition. At this point in time, the outcome of such talks is uncertain. No fundamental strategic decision has been made.

Stable financial position

Our balance sheet remains solid, with an equity ratio of 42.3%, a net LTV of 34.7%, and an adequate liquidity position. Our disciplined approach to capex and expenses both underlines and ensures that we are well positioned to seize any opportunities effectively.

Completed share buyback

Our share buyback programme commenced on November 28, 2024, and was completed on February 27, 2025.

In Q1 2025, 1,307,959 bearer shares were purchased, corresponding to approximately 1.23% of the share capital. The weighted average price paid per share in Q1 was €22.97, which corresponds to a discount to IFRS NAV of 12.9%. The total value of the shares acquired in Q1 amounted to around €30.0m.

At the end of the buyback programme, CA Immo held 10,649,642 of its own shares (as of December 31, 2024: 9,341,683 treasury shares), which corresponds to approximately 10.0% of the total number of issued shares. The repurchase was carried out for any purpose permitted by the resolution of the General Meeting, with a fundamental objective of enhancing shareholder value.

Successful Annual General Meeting

The 38th Annual General Meeting of CA Immo was held on 5 May 2025. Considering the company's own shares, which do not carry voting rights, attendance stood at approximately 78% of the share capital, represented by 375 shareholders and shareholder representatives.

All resolutions proposed by the company received the legally required majority, including the re-election of Mr. Torsten Hollstein to the Supervisory Board and a dividend payment of €1.00 per dividend-entitled share, which is an increase of 25% yoy. The dividend was paid out on 14 May 2025.

Outlook 2025

The real estate market remains dynamic and to some extent unpredictable, influenced by higher interest rates compared to pre 2022 levels, economic fluctuations, regulatory changes, and evolving tenant needs. Increasing political uncertainty, exacerbated by the US tariff regime, among other factors, is expected to affect the economic performance in Europe, which in turn may have a direct impact on the demand for office space.

This environment creates fierce competition for capital, which requires discipline and a strong focus to protect our core business, as well as a willingness to embrace change in order to emerge stronger and seize new opportunities as they arise.

Looking ahead, we remain cautiously optimistic about the office market, and are realistic about the difficult market environment in which we operate. We expect office markets to continue to bifurcate, with greater pricing pressure on weaker assets in non-central locations. With

our focused prime office portfolio and our agile management approach, we believe we remain well positioned to overcome these challenges.

Our strategic priorities remain focused on (1) accelerating non-core disposals, (2) simplifying our business model, (3) increasing critical mass and driving economies of scale, (4) continued disciplined investment in financially accretive developments and income-producing properties, particularly in our core markets of Berlin and Munich, (5) selective external investment, (6) maintaining a strong balance sheet and stable financing KPIs / covenants and (7) returning excess capital to shareholders.

As we move forward, we remain focused on delivering sustainable value to our stakeholders. We are confident that with our clear strategy, strong financial foundation, and talented team, CA Immo is well positioned for continued success. Our recurring earnings (FFO I) target for the full year 2025 will be published as part of our Q2 reporting.

We would like to thank our shareholders for their trust and confidence in us as stewards of their capital, and all the dedicated CA Immo employees for their hard work and contribution in these uncertain times.

Vienna, 21 May 2025
The Management Board

Keegan Viscius
(Chief Executive Officer)

Andreas Schillhofer
(Chief Financial Officer)

CAPITAL MARKETS

ECONOMIC ENVIRONMENT

The International Monetary Fund (IMF) expects global growth to slow to 2.8% in 2025 and 3.0% in 2026, significantly below the historical average of 3.7% between 2000 and 2019. This deterioration is mainly due to the rapid escalation of protectionist measures, particularly U.S. tariffs introduced since early April 2025, which have increased economic uncertainty worldwide and severely disrupted trade flows. Growth is slowing noticeably in advanced economies: in the United States, it is estimated at 1.8% (–0.9 percentage points compared to the January forecast), and in the euro area at just 0.8%. Emerging markets and developing countries are projected to grow by 3.7% in 2025, with countries like China especially affected by tougher trade conditions and structural weaknesses.

Global inflation continues to decline, though more slowly than previously expected. The IMF forecasts a global inflation rate of 4.3% for 2025 and 3.6% for 2026. In advanced economies, inflation is expected to move more quickly towards the 2% target, while in many emerging markets it remains elevated – due in part to volatile commodity prices and ongoing exchange rate risks. Major central banks are acting cautiously: while the Fed and the ECB are considering moderate rate cuts depending on inflation trends, monetary policy remains restrictive in many developing and emerging economies, largely due to high external debt and capital outflows.

Risks to the global economy remain significant. In the short term, geopolitical tensions, a potential escalation of tariff conflicts, and abrupt market reactions to political uncertainty. In the medium term, structural challenges such as declining productivity, high public debt, aging populations, and insufficient investment in digital and climate-friendly technologies are weighing on growth prospects.

Europe is particularly affected. Although it is slowly recovering from recent crises, it continues to grapple with persistent core inflation, weak industrial momentum, and fiscal pressures. The European Central Bank faces the dilemma of balancing inflation control with the need to stimulate growth. At the same time, member states must consolidate their budgets despite shrinking fiscal space while also funding new expenditures – such as for defense. Demographic change and a shortage of skilled labor further hinder long-term recovery. Risks also exist in the banking sector, particularly in commercial real estate, and due to potential side effects of tighter migration policies.

In the fourth quarter of 2024, seasonally adjusted GDP remained stable in the euro area (0.0%) and increased by 0.1% in the EU compared to the previous quarter. In the third quarter of 2024, GDP had increased by 0.4% in both areas. Compared with the same quarter of the previous year, seasonally adjusted GDP in Q4 2024 rose by 0.1% in the euro area and by 0.2% in the EU. For the whole of 2024, preliminary estimates indicate a real GDP increase of 0.4% in the euro area and 0.5% in the EU.

In March 2025, the seasonally adjusted unemployment rate in the euro area stood at 6.2%, unchanged from February 2025 and down from 6.5% in March 2024. The unemployment rate in the EU was 5.8% in March 2025, also unchanged from February and down from 6.0% a year earlier.

Annual inflation in the euro area is estimated at 2.2% in April 2025, stable compared to March 2025. Among the main components of euro area inflation, "services" are expected to show the highest annual rate in April (3.9%, up from 3.5% in March), followed by "food, alcohol, and tobacco" (3.0%, up from 2.9%), "non-energy industrial goods" (0.6%, unchanged), and "energy" (–3.5%, down from –1.0%).

At the end of Q4 2024, the gross government debt-to-GDP ratio was 87.4% in the euro area and 81.0% in the EU. Compared to the end of Q3 2024, this represents a slight decrease in the euro area (from 88.2% to 87.4%) and a slight decrease in the EU (from 81.6% to 81.0%).

The seasonally adjusted government deficit as a percentage of GDP amounted to 3.2% in the euro area and 3.4% in the EU in Q4 2024. Compared to Q3 2024, the deficit rose from 2.8% to 3.2% in the euro area and from 3.0% to 3.4% in the EU.

On April 17, 2025, the ECB Governing Council decided to lower the ECB's three key interest rates by 25 basis points each. Effective April 23, 2025, the rates are 2.50% for the deposit facility, 2.65% for the main refinancing operations, and 2.90% for the marginal lending facility.

This decision reflects the ECB Governing Council's updated assessment of the inflation outlook, underlying inflation dynamics, and the strength of monetary policy transmission. The disinflation process is progressing well, and inflation has generally developed in line with expectations. ECB Experts now forecast headline inflation to average 2.3% in 2025, 1.9% in 2026, and 2.0% in 2027. Core inflation (excluding energy and food) is projected to average 2.2% in 2025, 2.0% in 2026, and 1.9% in 2027. Most measures of underlying inflation suggest

that inflation is likely to sustainably settle around the medium-term target of 2%.

Monetary policy is becoming noticeably less restrictive as rate cuts make borrowing more affordable for businesses and households, thereby encouraging credit growth. At the same time, the easing of financing conditions is being dampened by the continued impact of earlier rate hikes on outstanding loans, and overall lending remains subdued.

The ECB Governing Council is committed to ensuring a sustainable return of inflation to its 2% medium-term target. It will maintain policy rates at sufficiently restrictive levels for as long as necessary to achieve this goal. The appropriate level and duration of restriction will continue to be data-dependent and determined on a meeting-by-meeting basis. Interest rate decisions are primarily based on the Council's assessment of the inflation outlook in light of current economic and financial data, the dynamics of underlying inflation, and the strength of monetary policy transmission. The Council does not pre-commit to any specific rate path.

At the press conference following the most recent monetary policy decisions, ECB President Christine Lagarde stated that downside risks to economic growth in the euro area have increased. Intensifying global trade tensions and uncertainties are likely to dampen exports and restrain investment and consumer spending. Additionally, financial markets may impose tighter conditions, reducing investment and consumption willingness. Geopolitical tensions, such as Russia's war against Ukraine and the conflict in the Middle East, remain significant

sources of uncertainty. On the other hand, increased defense and infrastructure spending could boost growth. Rising disruptions in global trade contribute to uncertainty regarding the inflation outlook. Falling energy prices and a strengthening euro may lower inflation. At the same time, higher tariffs and geopolitical tensions could increase inflation by reducing export demand and rerouting exports. Fragmented supply chains could push up import prices, further fueling inflation. Finally, extreme weather events and the climate crisis could cause food prices to rise more than expected.

SHARE PRICE DEVELOPMENT, TRADING LIQUIDITY AND MARKET CAPITALISATION OF THE CA IMMO SHARE

Since the beginning of the year, the CA Immo share has declined by around 4%, closing at €22.40 on 31 March 2025. In comparison, the ATX gained approximately 11%, while the European real estate index EPRA (excluding UK) fell by 2% over the same period. The CA Immo share reached its high of the year on 31 January 2025 at €24.02, and its low of the year on 14 January 2025 at €21.50.

As of 31 March 2025, CA Immo's market capitalisation stood at approximately €2.4bn (31 March 2024: €3.5bn). The average daily trading volume (single count) dropped significantly in the first three months of 2025, decreasing by 62% compared to the same period in the previous year, to 98,200 shares (2024: 258,900 shares). The average daily liquidity (single count) also declined by around 72% year on year, reaching €2.2 m (Q1 2024: €8.0 m).

ORDINARY GENERAL MEETING 2025

The 38th Annual General Meeting of CA Immo was held on 5 May 2025. Taking into account the company's own shares, which do not carry voting rights, attendance stood at approximately 78% of the share capital, represented by 375 shareholders and shareholder representatives.

In addition to the regular agenda items (appropriation of profits, discharge of the Management and Supervisory Boards, determination of Supervisory Board remuneration, appointment of Deloitte Audit Wirtschaftsprüfungs

GmbH as auditor of the financial statements and consolidated financial statements for the 2025 financial year — and, if required at a later date, the sustainability report — and the resolution on the remuneration report for the 2024 financial year), the re-election of Mr. Torsten Hollstein to the Supervisory Board was also put to a vote. Furthermore, resolutions were passed regarding the Management Board's authorisations related to the acquisition and disposal of treasury shares, including the possible exclusion of shareholders' (reverse) subscription rights in connection with the acquisition of treasury shares. All resolutions proposed by the company received the legally required majority.

The resolution on the appropriation of profits provided for a dividend of €1.00 per dividend-entitled share to be distributed from the distributable profit of €454,845,258.79 reported as of 31 December 2024. The remaining balance was carried forward to new account. The dividend was paid out on 14 May 2025.

SHARE BUYBACK PROGRAMME

On November 11, 2024, the management board of CA Immobilien Anlagen AG decided – based on the authorization resolution of the 36th Ordinary General Meeting dated May 4, 2023, and in accordance with Section 65(1) No. 8 of the Austrian Stock Corporation Act (AktG) - to implement an additional share buyback programme ("Authorization"). The volume of this program amounts to up to 1,869,606 shares (this corresponds to approximately 1.76% of the company's current share capital). The share buyback programme involves the acquisition of shares via the stock exchange. The conditions for these purchases are governed by the authorization. In particular, the countervalue to be paid for the repurchase must fall within the range specified by the authorization resolution of the General Meeting and must not be more than 30% below, nor more than 10% above, the average unweighted closing price on the stock exchange during the ten trading sessions preceding the repurchase. The maximum amount payable shall not exceed the most recently published IFRS NAV per share.

The buyback programme commenced on November 28, 2024, and was scheduled to end no later than November 3, 2025. The repurchase is carried out for any purpose permitted by the resolution of the General Meeting, with a fundamental objective of enhancing shareholder value.

By December 31, 2024, a total of 561,646 shares had been acquired under the ongoing programme. The highest price paid per share was €24.50, while the lowest was €22.74. The weighted average price paid per share was €23.52, and the total value of the acquired shares amounted to €13,210,531.28.

The share buyback programme was terminated on 27.02.2025. In total, 1,869,605 bearer shares were purchased, corresponding to approximately 1.76% of the share capital. The highest price paid per share was €24.50, and the lowest was €21.50. The weighted average price paid per share was €23.13, and the total value of the acquired shares amounted to €43,252,102.76. At the end of the buyback programme, CA Immo held 10,649,642 of its own shares (as of December 31, 2024: 9,341,683 treasury shares), which corresponds to approximately 10.00% of the total number of issued shares.

Details regarding the transactions executed under the share buyback programmes, as well as any changes to the ongoing share buyback programme, will be published on the company's website (www.caimmo.com/share-buy-back).

BONDS & RATING

As of the balance sheet date, four corporate bonds of CA Immo were listed on the Official Market of the Vienna Stock Exchange and partially on the Regulated Market of the Luxembourg Stock Exchange (Bourse de Luxembourg).

The rating agency Moody's currently rates CA Immo's long-term issuer rating and the senior unsecured ratings of the outstanding corporate bonds at Baa3 with a stable outlook. The rating was last confirmed by Moody's in April 2025.

CAPITAL STOCK AND SHAREHOLDER STRUCTURE

The share capital of CA Immo amounts to €774,229,017.02 and is divided into four registered shares and 106,496,422 ordinary bearer shares, each representing €7.27 of the share capital. The bearer shares are listed on the Prime Market of the Vienna Stock Exchange (ISIN: AT0000641352).

With a stake of around 62% (66,531,265 bearer shares and four registered shares at the time of reporting), SOF-

11 Klimt CAI S.à r.l., Luxembourg, a company managed by Starwood Capital Group, is CA Immo's largest shareholder. Starwood Capital Group is a private investment firm with a core focus on global real estate. The remaining shares in CA Immo are held in free float by institutional and private investors.

FINANCIAL CALENDAR 2025

21.05.2025

INTERIM REPORT FOR THE FIRST QUARTER 2025

26.11.2025

INTERIM REPORT FOR THE THIRD QUARTER 2025

27.08.2025

HALF-YEAR RESULT 2025

PROPERTY ASSETS

The company's core business is commercial real estate, with a clear focus on office properties across the gateway cities in Germany, Austria and the CEE region; it deals with both investment properties (85% of the total portfolio) and investment properties under development (11% of the total portfolio). Properties intended for trading or

sale (reported under short-term property assets) account for the remaining 4% of property assets.

As at the reporting date of 31 March 2025, the value of **total property assets** stood at around €4.9bn (31.12.2024: €5.0bn).

PROPERTY ASSETS OF THE CA IMMO GROUP AS AT 31 MARCH 2025

in € m	Investment properties ¹⁾	Investment properties under development	Short-term property assets ²⁾	Property assets	Property assets in %
Germany	2,759.2	520.9	108.6	3,388.6	69.12

share of total portfolio	85%	11%	4%		

¹⁾ Includes properties used for own purposes and Right of Use

²⁾ Short-term property assets include properties intended for trading or sale

³⁾ Includes non-core investment properties in Hungary and one non-core investment property in Serbia, which is classified as short-term property asset.

CHANGES TO THE PORTFOLIO IN THE FIRST QUARTER OF THE YEAR 2025

Sales

CA Immo successfully completed the sale of older and non-strategic portfolio buildings in the first three months of the year. In total, sales proceeds of €91.5m (31.03.2024:

€33.0m, incl. sale of real estate owned pro rata by CA Immo, at equity) were generated across the Group.

In the case of company sales (share deals), the sales proceeds are the net position of the sales price achieved for the property, less borrowings, plus other assets.

OVERVIEW OF SALES TRANSACTIONS COMPLETED IN THE FIRST QUARTER OF THE YEAR 2025

Property name	City	Main Usage	Type	Assets	Sales date (closing)	Share ¹⁾	Area in sqm ²⁾	Book Value (Closing) in €m

²⁾ Area: for investment properties: Rentable area

INVESTMENT PROPERTIES

This chapter shows key performance indicators for CA Immo's investment properties such as occupancy rates and yields. Properties used for own purposes and "Right-of-use" assets are not included in the calculation of these figures. For this reason, these property types are also excluded from the portfolio book values and the rentable area in the table "Overview investment property key figures" and reported separately in the line "Other investment properties".

As at 31 March 2025, the investment portfolio had an approximate book value of €4.2bn (31 December 2024: €4.3bn) and incorporated a total rentable effective area of around 0.9m sqm. The decline is due to the sale of investment properties (see section "Property assets"), the reclassification of one investment property in Prague to short-term property assets (IFRS 5), and the

reclassification of one investment property to properties under development (renovation project in Berlin).

Around 66% of the portfolio (based on book value) is in Germany, 28% of the remaining investment properties are located in CEE, and 6% in Austria. In the first three months of the year 2025, the Group generated rental income of €68.5m (31 March 2024: €64.0m). As at the reporting date, the portfolio produced a yield of 5.5% (31 December 2024: 5.5%) with the occupancy rate at 93.5% (31 December 2024: 93.1%).

Lettings Performance

In the first three months of the year 2025, a total of around 35,000 sqm of rentable area was newly let or extended. 43% of all leases were new leases or lease expansions, 50% accounted for lease extensions and 7% were attributable to extension options exercised.

OVERVIEW INVESTMENT PROPERTIES KEY FIGURES AS AT 31 MARCH 2025

	Book value investment properties in € m	Rentable area ³⁾ in sqm	Occupancy rate ⁴⁾ in %	Annualised rental income in € m	Yield in %
Germany	2,754.3	414,180	95.3	127.6	4.6

Like-for-like portfolio development

The like-for-like analysis of the portfolio provides an overview of the organic year-on-year development of the key portfolio figures, adjusted for portfolio changes (property additions and disposals) to enable comparability. The reduction in the balance sheet value as well as

the increase in the gross yield during the first three months of 2025 resulted mainly from the negative net result from property valuation, which reflects changed market conditions in all CA Immo markets. Rising rental income is the result of lease adjustments due to indexation clauses and good letting performance.

LIKE-FOR-LIKE COMPARISON

m	Book values		Rental income P&L		Gross yield in % ¹⁾		Occupancy rate in % ²⁾	
	Q1 2025	Q1 2024 ³⁾	Q1 2025	Q1 2024 ³⁾	Q1 2025	Q1 2024 ³⁾	Q1 2025	Q1 2024 ³⁾
Germany	2,754.3	2,789.3	37.1	32.6	4.6	4.4	95.3	93.9

¹⁾ Annualised contractual rent/balance sheet value

²⁾ Occupancy by area in sqm

³⁾ The previous year's figures differ from the figures published for the first three months of 2024 due to the like-for-like calculation

⁴⁾ Excluding strategic vacancies: strategic vacancies are defined as space that is not let for strategic reasons, for example while modernisation work is being carried out or in order to optimise a building's tenant structure.

⁵⁾ Including investment properties in Hungary (non-core properties)

INVESTMENT PROPERTIES UNDER DEVELOPMENT

The **investment properties under development** with a total book value of around €525.3m (31 December 2024: €461.0m) comprise development projects and land reserves.

This figure also includes land and projects intended for trading.

INVESTMENT PROPERTIES UNDER DEVELOPMENT BY COUNTRY AS AT 31 MARCH 2025

SUPPLEMENTARY REPORT

The following activities after the key date of 31 March 2025 are reported:

Sales

The sale of the IntercityHotel Berlin Hauptbahnhof was completed at the beginning of April 2025. This was followed at the end of April by the sale of the Sava Business Center property in Belgrade, marking the company's exit from the Serbian market.

Annual General Meeting and dividend

The 38th Annual General Meeting of CA Immo was held on 5 May 2025. Taking into account the company's own shares, which do not carry voting rights, attendance stood at approximately 78% of the share capital, represented by 375 shareholders and shareholder representatives.

In addition to the regular agenda items (appropriation of profits, discharge of the Management and Supervisory Boards, determination of Supervisory Board remuneration, appointment of Deloitte Audit Wirtschaftsprüfungs

GmbH as auditor of the financial statements and consolidated financial statements for the 2025 financial year – and, if required at a later date, the sustainability report – and the resolution on the remuneration report for the 2024 financial year), the re-election of Mr. Torsten Hollstein to the Supervisory Board was also put to a vote. Furthermore, resolutions were passed regarding the Management Board's authorisations related to the acquisition and disposal of treasury shares, including the possible exclusion of shareholders' (reverse) subscription rights in connection with the acquisition of treasury shares. All resolutions proposed by the company received the legally required majority.

The resolution on the appropriation of profits provided for a dividend of €1.00 per dividend-entitled share to be distributed from the distributable profit of €454,845,258.79 reported as of 31 December 2024. The remaining balance was carried forward to new account. The dividend was paid out on 14 May 2025.

RESULTS

Result from letting

In the first three months of 2025, CA Immo recorded an increase in rental income of 7.1% to €68.5m (1Q 2024: €64.0m). This development is primarily attributable to higher rental income from investment properties (+€5.6m), which more than offset the decline in rental income resulting from the sale of non-strategic properties as part of the strategic capital rotation programme (€-1.0m) and the reclassification of investment properties as properties under development (€-0.1m).

Property expenses directly attributable to the asset portfolio – including own operating expenses – stood at €-14.4m (1Q 2024: €-15.8m). Net rental income after the first three months was €54.1m (1Q 2024: €48.2m), an increase of 12.4% on the previous year.

The efficiency of letting activity, measured as the operating margin in rental business (net rental income to rental income), stood at 79.0% and therefore significantly above the previous year's value of 75.3%. The comparatively lower margin in the first quarter, relative to other quarters, is primarily attributable to property taxes recognized in the first quarter.

Other expenditure directly attributable to project development stood at €-1.1m after three months, against €-0.3m in 1Q 2024. Gross revenue from services stood at €0.2m, below the previous year's value of €0.7m. This item mainly included development revenues for third parties generated via the subsidiary omniCon, which was spun off from the company on January 31, 2024.

Sales result

As at the key date, the result from property trading and construction services stood at €1.9m (1Q 2024: €-0.3m). The result from the sale of investment properties amounted to €2.7m in 1Q 2025 (€0.0m in 1Q 2024).

Indirect expenses

Indirect expenditures stood at €-8.8m in the first three months of 2025, -21.4% below the previous year's level (1Q 2024: €-11.2m) and mainly driven by significantly reduced personnel expenses. This item also contains expenditure counterbalancing the aforementioned €0.2m gross revenue from services.

Other operating income

Other operating income stood at around €0.1m, compared to the 1Q 2024 value of €0.0m.

Earnings before interest, taxes, depreciation and amortisation (EBITDA)

As a result of the developments outlined, earnings before interest, taxes, depreciation and amortisation (EBITDA) increased by 32.5% to €49.1m (compared to €37.0m in 1Q 2024).

Revaluation result

After the first three months of 2025, the total revaluation gain amounted to €2.6m, with a revaluation loss of €-13.5m. This resulted in a net revaluation of €-10.9m (€-8.2m in 1Q 2024). CA Immo conducts external valuations on a semi-annual basis (at mid-year and year-end). The valuation result in the first quarter is therefore primarily driven by technical effects.

Result from joint ventures

Current results of joint ventures consolidated at equity are reported under 'Result of joint ventures' in the consolidated income statement and amounted to €0.8m as at the reporting date (€1.8m in 1Q 2024).

Earnings before interest and taxes (EBIT)

Earnings before interest and taxes (EBIT) of €38.0m was 27.7% above the 1Q 2024 result of €29.8m.

Financial result

The financial result stood at €-11.2m after the first three months (1Q 2024: €-7.9m). The Group's financing costs amounted to €-15.3m, 9.3% above the value for 1Q 2024 (€-14.0m). The main reason for this was the issuance of the €350m green bond in October 2024.

The result from derivatives amounted to €0.9m (€5.2m in 1Q 2024). The result from financial investments of €3.8m increased compared to the reference value for the previous year's period of €1.3m. Other items in the financial result totaled €-0.6m (€-0.4m in 1Q 2024).

Taxes on income

Earnings before taxes (EBT) totaled €26.8m and were thus higher than the previous year's figure of €21.9m. On the key date, income tax expense was €-4.3m (1Q 2024: €-5.9m).

Consolidated net result

Consolidated net result was €22.5m, also up on the 1Q 2024 value of €16.1m. Earnings per share amounted to €0.23 on the balance sheet date (€0.16 per share in 1Q 2024).

Funds from operations (FFO)

In the first three months of 2025, FFO I of €34.2m was generated, which is 28.0% above the previous year's figure of €26.7m. FFO I is a key indicator of the Group's recurring earnings power and is reported before taxes and adjusted for the result from disposals and other non-recurring effects. Adjusted non-recurring effects amounted in total to €0.0m (1Q 2024: €0.4m).

FFO I per share amounted to €0.36 as of the reporting date and was thus 29.9% above the previous year's figure (1Q 2024: €0.27 per share).

FFO II, including property sales result, other non-recurring earnings effects and after tax, is an indicator of the Group's overall profitability and amounted to €29.3m as of the reporting date, 11.1% above the figure for the first three months of 2024 of €26.3m. FFO II per share stood at €0.30 (1Q 2024: €0.27 per share).

FUNDS FROM OPERATIONS (FFO)

Balance sheet: assets

As at the balance sheet date, long-term assets amounted to €4,757.5m (78.8% of total assets). Investment property assets on balance sheet stood at €4,148.8m on the key date (31.12.2024: €4,249.7m). The decline in investment property assets is primarily due to the reclassification of the property Hallesches Ufer in Berlin from investment properties to properties under development, as well as

the reclassification of the Visionary property in Prague as assets held for sale (IFRS 5).

The balance sheet item 'Property assets under development' was €521.4m on 31.03.2025 (31.12.2024: €457.0m). Total property assets (investment properties, properties used for own purposes, property assets under development and property assets held as current assets)

amounted to €4,902.5m on the key date (€4,964.8m on 31.12.2024).

The net assets of joint ventures are shown in the balance sheet item 'Investments in joint ventures', which stood at €23.0m on the key date (€62.6m on 31.12.2024). The decrease results from the reclassification of the interest in the Eggartensiedlung joint venture in Munich to assets held for sale (IFRS 5).

Cash and cash equivalents incl. cash deposits stood at €897.9m on the balance sheet date (€797.3m on 31.12.2024).

Balance sheet: liabilities

Equity

As at the key date, shareholders' equity on the Group balance sheet stood at €2,554.0m (€2,562.2m on 31.12.2024). Since the start of the year, total assets increased by around 0.2% to €6,040.2m (31.12.2024: €6,028.6m). The equity ratio remains solid at 42.3% (31.12.2024: 42.5%).

Interest-bearing liabilities

The Group's financial liabilities amounted to €2,621.2m as of the reporting date (31.12.2024: €2,720.8m). Net debt (interest-bearing liabilities less cash and cash equivalents, cash deposits and restricted cash) stood at €1,700.6m at the end of March 2025 (31.12.2024: €1,895.9m). 100% of liabilities to banks and bonds are denominated in Euro.

Gearing (net debt to equity) was 66.6% at the reporting date (31.12.2024: 74.0%). The loan-to-value ratio based on balance sheet values was 34.7% (net, taking into account the Group's cash and cash equivalents, cash deposits and restricted cash) as of 31.03.2025, compared to 38.2% at the beginning of the year.

KEY BALANCE SHEET AND FINANCING FIGURES

€ m	31.03.2025	31.12.2024
Shareholders' equity	2,554.0	2,562.2
Long-term interest-bearing liabilities	2,100.8	2,355.7
Short-term interest-bearing liabilities	520.4	365.1
Cash and cash equivalents	-747.2	-647.0
Restricted cash	-22.7	-27.6
Cash deposits	-150.7	-150.4
Net debt	1,700.6	1,895.9
Equity ratio	42.3	42.5

Gearing (gross)	102.6	106.2
Loan-to-value (net)	34.7	38.2
Loan-to-value (gross)	53.5	54.8

EPRA METRICS

In order to ensure comparability with other listed property companies, CA Immo reports individual key figures in accordance with the standards of EPRA (European Public Real Estate Association), the leading interest group for listed property companies. These key figures may differ from the values determined in accordance with IFRS rules. CA Immo follows EPRA's 'Best Practice Recommendations' (www.epra.com).

EPRA NET ASSET VALUE (NAV)

With the publication of the EPRA Best Practices Recommendations Guidelines October 2019, the net asset value reporting was revised with the aim of better reflecting recent market and company developments. As a consequence, EPRA NAV and EPRA NNNAV were replaced by three new Net Asset Valuation metrics: EPRA Net Reinstatement Value, EPRA Net Tangible Assets and EPRA Net Disposal Value. CA Immo has only reported these key figures as of Q1 2021, which are defined by EPRA as follows:

EPRA KEY FIGURES

EPRA Key Figures		31.03.2025	31.12.2024
EPRA NRV	€ m	3,323.6	3,350.4
EPRA NRV per share	€	34.68	34.48
EPRA NTA	€ m	3,088.2	3,104.3
EPRA NTA per share	€	32.22	31.95
EPRA NDV	€ m	2,601.1	2,617.5
EPRA NDV per share	€	27.14	26.94

EPRA Net Reinstatement Value

The objective of the EPRA Net Reinstatement Value measure is to highlight the value of net assets on a long-term basis. Assets and liabilities that are not expected to crystallise in normal circumstances such as the fair value movements on financial derivatives and deferred taxes on property valuation surpluses are therefore excluded.

Since the aim of the metric is to also reflect what would be needed to recreate the company through the investment markets based on its current capital and financing structure, related costs such as real estate transfer taxes should be included.

EPRA Net Tangible Assets

The underlying assumption behind the EPRA Net Tangible Assets calculation assumes entities buy and sell assets, thereby crystallising certain levels of deferred tax liability.

EPRA Net Disposal Value

Shareholders are interested in understanding the full extent of liabilities and resulting shareholder value if company assets are sold and/or if liabilities are not held until maturity. For this purpose, the EPRA Net Disposal Value provides the reader with a scenario where deferred tax, financial instruments, and certain other adjustments are calculated as to the full extent of their liability, including tax exposure not reflected in the Balance Sheet, net of any resulting tax. This measure should not be viewed as a "liquidation NAV" because, in many cases, fair values do not represent liquidation values.

Net Asset Value (IFRS) stood at €2,553.9m on 31 March 2025 (€26.65 per share) against €2,562.1m at the end of 2024 (€26.37 per share); this represents a decrease of 0.3% (+1.0% per share).

EPRA Net Tangible Assets (NTA) stood at €3,088.2m as at the reporting date, which is 0.5% lower than the value at year-end 2024 (€3,104.3m). This corresponds to an EPRA NTA per share of €32.22, 0.8% above the EPRA NTA as at 31 December 2024 of €31.95 per share.

The number of shares in circulation on the reporting date was 95,846,784 (31 December 2024: 97,154,743).

NET ASSET VALUE (NRV, NTA AND NDV AS DEFINED BY EPRA)

EPRA LOAN-TO-VALUE

Loan-to-value (LTV) is a widely used metric in corporate reporting. However, as there is no predefined and generally accepted concept on how to calculate and report LTV, investors, analysts and financing professionals often find that the calculation of the ratio is inconsistent among different listed real estate companies and in different jurisdictions.

The objective of the EPRA LTV is to assess the gearing of the shareholders' equity within a real estate company. To achieve this goal, EPRA LTV provides adjustments to IFRS reporting.

The EPRA LTV is calculated on the basis of a proportional consolidation. This means that EPRA LTV includes the Group's share of the net debt and net assets of joint ventures or significant associated companies. Assets are recognized at fair value, net debt at nominal value.

EPRA LOAN-TO-VALUE

€ m	31.03.2025			31.12.2024

EPRA YIELDS

The type and scope of yield disclosures often vary and the metrics used are not consistently defined. In order to provide comparable reporting in terms of yields across Europe, EPRA has defined two yield measures.

The EPRA Net Initial Yield is calculated as annualised rental income based on rents at the balance sheet date,

less non-refundable property operating costs, divided by the market value of the property. The EPRA "topped up" Net Initial Yield is calculated using an adjustment in respect of the granting of rent-free periods (or other unexpired lease incentives such as discounted lease periods and step-rents).

EPRA YIELDS ¹⁾

€ K	Austria	Germany	Czechia	Poland	Others ²⁾	Total
Investment properties	249,600	2,927,295	406,200	452,500	297,400	4,332,995
Annualised cash rental income (net)	11,944	100,763	21,223	28,012	17,814	179,755
EPRA Net Initial Yield	4.8%	3.4%	5.2%	6.2%	6.0%	4.1%
Lease incentives	-149	1,403	-831	1,069	-2,146	-654
EPRA "topped-up" Net Initial Yield	4.7%	3.5%	5.0%	6.4%	5.3%	4.1%

¹⁾ Based on the like-for-like portfolio adjusted for transaction costs

²⁾ Including investment properties in Hungary (non-core properties)

EPRA VACANCY RATE

Vacancy rate reporting is not standardised across the real estate industry. In order to promote comparable and consistent reporting, the EPRA requirements specify a single, clearly defined vacancy rate disclosure. The EPRA Vacancy Rate is to be expressed as a percentage equal to the expected rental value of vacant space divided by the expected rental value of the entire portfolio. The EPRA Vacancy Rate is calculated only for completed properties (investment, trading and including share of joint ventures' vacancy), but excluding properties under development.

EPRA VACANCY RATE

	Vacancy ERV	Full Reversion ERV	EPRA Vacancy Rate
Germany	7.1	158.1	4.5%
Austria	1.2	14.9	8.0%
Poland	2.6	31.1	8.3%
Czechia	1.4	24.0	5.8%
Others ¹⁾	3.3	23.1	14.3%
CEE	7.3	78.2	9.3%
Total	15.6	251.2	6.2%

¹⁾ Including investment properties in Hungary (non-core properties)

EPRA COST RATIOS

The EPRA Cost Ratios are aimed at providing a consistent baseline from which companies can provide further information around costs where appropriate. The EPRA recommendation therefore includes suggestions for how companies might provide this additional information.

The EPRA Cost Ratio shows the company's cost efficiency by comparing the proportional share of the operating and administrative expenses for investment property – both including and excluding direct vacancy costs – to gross rental income for the reporting period.

EPRA COST RATIOS

€ m	31.03.2025	31.03.2024
Expenses from investment property	(14.4)	(15.8)
Exclude:		
Ground rent costs	(0.0)	(0.0)
EPRA costs (including direct vacancy costs) (A)	(14.4)	(15.8)
Vacancy costs	(1.8)	(2.7)
EPRA costs (excluding direct vacancy costs) (B)	(12.6)	(13.1)
Gross rental income (C)	61.5	57.5
EPRA cost ratio (including direct vacancy costs) (A/C)	23.4%	27.5%
EPRA cost ratio (excluding direct vacancy costs) (B/C)	20.5%	22.8%

RISK REPORT

KEY RISKS

The risks that have or could have a significant impact on CA Immo, as well as information on the risk management system and risk-bearing capacity, can be found on pages 66 to 76 of the 2024 Annual Report.

No further significant risks that would lead to a different assessment of the risk profile have arisen or become apparent in the course of the 2025 business year to date. The comments in the 2024 Annual Report, chapter “Risk report” therefore continue to apply.
